Note: -RK Kits include: Repair Kit, Vacuum Breaker, Tailpiece O-Ring, and Handle Repair Kit.

WHY USE ZURN "GO BLUE" PARTS?

Superior chemical resistance equates to 8-10 times longer life than traditional black rubber components.

- Chemical and Clog Resistant Diaphragm
- Diaphragm Disc
- No Leak Handle O-Ring
- Handle Seal / Handle Washer
- Tailpiece O-Ring
- Stop Valve Seal / Stop Valve O-Ring
- Vacuum Breaker
- Spud Gasket / Spud Washer

BEFORE TESTING

Sustainability and performance ...
AquaVantage®.
 The best performing flush valve diaphragm.

HOW THE ZURN DIAPHRAGM WORKS

- 1 Water from the lower valve chamber is directed through a plurality of individual passageways and into one of the twenty-two filter cells found around the perimeter of the diaphragm. Each filter cell stops unwanted debris and allows only clean water to proceed toward the main orifice.
- 2 The filtered water then travels over a number of parabolic weirs. Each weir acts as a small dam causing the finest of sediment to settle from the water flow.
- 3 The filtered water is then filtered one more time through another set of filter holes strategically placed adjacent to the main orifice. Only clean, filtered water is passed through the main by-pass orifice.

WHY USE ZURN SENSOR PRODUCTS?

- Increased Sanitation
- User Friendly
- Water Savings
- Hands-Free Operation
- Eliminates Odors and Unflushed Fixtures
- Reduced Flush Valve Maintenance
- Improves Building Presentation
- Modern Appearance

ZERK-CCP E-Z Flush Sensor

The Zurn AquaSense® E-Z Flush® Sensor is the most installer-friendly flush valve retrofit kit on the market today. Not only does E-Z Flush provide you the fastest and easiest changeover, but E-Z Flush gives you the tools, batteries and adaptors to start and complete the job. Once installed, E-Z Flush provides trouble-free automatic flushing for both the building owner and the user.

ZRK-C-1.6-DF RetroFlush Sensor

The Zurn RetroFlush® Dual Flush uses the latest sensor technology to offer unparalleled performance while saving you money and water. The Dual Flush model features two flush cycles. A reduced flush that saves 30% water and a standard full flush make Dual Flush an excellent choice for owners looking to reduce building cost and water usage.
